## [IPL Skin Rejuvenation Equipment](#)

### **IPL Skin Rejuvenation Equipment**

This page will primarily introduce 4 types of IPL skin rejuvenation equipment which comes with varied appearance design. Our IPL skin rejuvenation equipment generates the colorful full spectrum intense pulsed light that penetrates into deep skin and acts on pigment or blood vessels selectively. The IPL at different wavelengths functions to break down color spot and eliminate reddish skin. In the meanwhile, the photons can stimulate the collagen tissue to be reorganized, thus achieving sweat pore minimizing, wrinkle removal, skin elasticity restore, and skin tightening, etc.

To let our users have a better idea of Noble IPL skin rejuvenation machine, we provide the following information.

#### **Applications**

IPL skin rejuvenation equipment is often used to remove acne, color spots, unwanted body hair, especially fine hair. It can also treat telangiectasis, and provides us an ideal beauty solution for whitening and softening skin, and improving the sensitive skin.

With reliable performance, our IPL beauty equipment is widely used in professional beauty hospitals, clinics, beauty salons, spas, laser beauty institutions, etc.

#### **Characteristics**

1. Different treatment heads are available for the treatment of different symptoms, thus ensuring good treatment effect.

2. Our IPL skin rejuvenation equipment can bring instant beauty results without scar, mark, or damage on the normal tissues. Customers can also quickly recover from the treatment, having no effect on normal work.

Due to these, our IPL beauty machines have won high degree of customer satisfaction.

#### **Why choose Noble product?**

1. Noble IPL skin rejuvenation equipment has three kinds of handpiece for your option, that is, integrated high power handpiece, handpiece with five filters, and portable handpiece with 4 adjustable gem heads. In addition, the integrated high power handpiece, which can generate output energy 20 percent higher than other ones, is our patented product.

2. This beauty equipment is equipped with semiconductor and water cooling system, which enables it to work continuously for a long time.

3. Designed in fast plug handpiece connection, it is more convenient for handpiece changing and won't cause any water leakage.

4. This IPL beauty machine is equipped with 5.7 inch LCD real color touch screen, so it is convenient for operation.

5. Coming with a high performance control system, the IPL skin rejuvenation equipment can adjust the parameters according to the skin color of customers automatically. This ensures better treatment effect.

6. It will be packed by aluminium cases most suitable for transportation.

#### **Technical parameters of IPL skin rejuvenation equipment Star-A, Star-B, Star-C, Star-D**

Lamp-house	Super intense pulsed light
Range of Spectrum	480-1200nm: remove acne
	530 -1200nm: speckle treatment
	560 -1200nm: skin rejuvenator
	590-1200nm: remove vessel
	640 -1200nm: remove unwanted hair
690-1200nm: remove unwanted hair	
Density of Energy	50J/cm <sup>2</sup>
Size of Spot	8*40mm <sup>2</sup> , 16*50 mm <sup>2</sup>
Amount of Pulse	1~6, adjustable
Interval of Pulse	1~99ms, adjustable
Sub-pulse Width	0.1~9.9ms, adjustable
Cycle	1~4s, adjustable
Cooling Way	semi-conductor cooling
Screen	5.7 inch color touch screen
Power Supply	220V ±10% 50Hz, 110V ±10% 60Hz

Thanks for your visit! Noble is a specialized IPL skin rejuvenation equipment manufacturer and supplier in China. We are capable of producing a wide range of beauty equipment, including oxygen jet skin care equipment, body slimming machine, and laser tattoo removal equipment, etc. All our products are CE certified and sold very well in Canada, America, Argentina, Britain, Italy, Singapore, Thailand, just to name a few.
